

INTUITIVE INTELLIGENCE

Smart, Integrated Surveillance

Smart, integrated surveillance enterprise protection

An integrated approach to security and incident management helps reduce risk to people, assets and the environment. Honeywell Digital Video Manager is a scalable, digital closed-circuit television (CCTV) surveillance solution that helps to increase operational efficiencies, decrease lifecycle costs, and improve users' decision-making capabilities. Integrated with Honeywell Enterprise Buildings Integrator (EBI), the value of DVM is amplified, typically delivering heightened levels of security and operational efficiencies. Promote operational efficiencies and business integrity with optimized enterprise-wide integrated protection.

The power of integrated security

INTEGRATED ENTERPRISE PROTECTION

An application of Honeywell Enterprise Buildings Integrator, DVM seamlessly integrates with other building automation systems including fire and life safety, access control, time and attendance, communications, IT sub systems, third party applications and more, enabling a more intuitive and easy to use security solution.

DO MORE WITH LESS

Users of the integrated security platform benefit from a single login with a fully integrated security context. Security operators can perform system configuration, viewing, recording, archiving and retrieval of video recordings from a single EBI workstation, promoting increased operational efficiency, removing operational silos and reducing training costs.

PREDICTIVE NOT REACTIVE SECURITY

Intelligent automation, intuitive alarming, video sensor technology and latest video analytics promote a predictive security solution, helping to mitigate risk. Recordings can be activated by platform alarms and accessible directly from the EBI alarm management screen through hotlinks to the recorded video promoting a more intuitive security management system.

REDUCE LIFECYCLE COSTS

DVM employs an extraordinary approach to security management that can reduce capital costs when compared to a proprietary hardware solution.

Subscribing to global standards for open integration of physical security products, DVM can typically be deployed into dedicated or existing IT infrastructure, enhancing interoperability, and is adaptable to specific requirements.

Honeywell, your integrated, innovative technologies provider.

Honeywell is a leading provider of intelligent security, building, energy and life-safety management solutions and services to thousands of facilities around the world. From design to installation, commissioning to maintenance support, we tap into both our global portfolio and our local expertise to provide customized solutions that help to solve your business challenges – today and tomorrow.

Emerging threats to commercial, industrial, transport, defence, and mission critical installations often require new ideas, technologies, and solutions to safeguard people, buildings, assets and businesses.

Our goal is to help you realize the full potential of advanced technologies by providing high-performance systems that deliver uncompromising reliability and sophisticated security solutions.

STAYING CURRENT STARTS NOW

Bringing your building automation system 'up-to-date' will promote enhanced business continuity, safety, security and stability. All of this in an affordable package that offers a fixed, predictable cost. Through ongoing lifecycle management of the automation system, additional financial benefits in the areas of energy and operational savings can also be achieved – often making updates cost neutral or even a net benefit.

Now is the perfect time to realize the many benefits of updating your building automation system. And Honeywell can show you how to do it painlessly through a new Lifecycle Management service contract. To take the first step, just contact your Honeywell representative or call +44 (0)870 600 1659.
